STUDENT AND FAMILY VISION High School Student

A Statement That Describes the Student's and Family's Hopes for the Future

You, as the parent/guardian, are an important part of the IEP meeting because you know your child better than anyone else. It would be helpful if you answer the following questions and concerns about your child and bring them to the IEP staffing. Your responses should address your child's future employment, living arrangements and education/training needs.

1.	What is it that you want for your child?
2.	What does your child want for himself or herself?
3.	What do you see as employment opportunities for your child?
4.	What skills or training will your child need in order to obtain employment in his/her chosen profession?
5.	What type of living arrangements do you see for your child after he/she completes high school?
6.	Are there any other concerns that you have about your child?
